- Remove irrelevant modules.
- Retain only the necessary information.

EDITING

◀ Restructure data

Clear introduction

Development

conclusion

PRESENTATION

Present your project neatly and visually by highlighting the key points.

MIND VECTOR

Mind Vector is a powerful mind mapping tool for Project Works.

The core idea or the theme is kept in the centre and maps are expanded by expanding the canvas.

Add thoughts by adding nodes, sub-nodes, icons, images, and notes.

Group members can add or delete information and save the changes.
